5.04. Astronomer

- (a) Learn the names of the planets in the solar system. Draw or create a model of the solar system.
- (b) Understand how the Earth orbits the Sun and how this movement causes night and day, as well as changes in the seasons.
- (c) Research and present information on two of the following: comets, the Northern Lights, meteorites, asteroids, space exploration, eclipses, or constellations.
- (d) Participate in a sky-watching activity and discuss your observations with your Leader.
- (e) Research and present information about a well-known astronomer.
- (f) Find out about a space mission currently in progress and talk about it.
