3.05. Naturalist

- (a) Explore local flora and fauna. Identify five local plants and animals, and share what you learned with your Pack.
- (b) Take a nature walk and document what you see (through drawings or photos). Describe how this environment is unique to the Maltese landscape.
- (c) Participate in a local environmental project, such as tree planting, litter cleanup, or helping in a local garden.
- (d) Create a nature-inspired artwork including elements to Malta. Present it to your group and explain how it connects to your country's natural identity.
- (e) Light, water, and carbon dioxide are the three essential things green plants need to grow. Explain why each of these elements is important.
