4.05. Marine Life

(a) Learn and explain to the pack the name of the sea surrounding Malta (the Mediterranean Sea) and why it is important for people and nature.

Include its role in providing food, recreation, transport, and habitats for marine animals.

(b) Identify five marine animals found around Malta and describe them to the pack.

(c) Describe different marine habitats found around Malta, such as:

- Sandy seabeds
- Rocky shores
- Seagrass meadows
- Coral reefs

(d) Learn and list three major threats to marine life, such as:

- Plastic pollution
- Oil spills
- Overfishing
- Then share two actions you can take to help protect marine animals and keep the sea clean.

(e) Explore a shoreline around the Maltese Islands and look for signs of marine life, such as:

- Shells
- Small fish
- Crabs
- Seagrass
- Take photos and share your findings with your pack.
